Report of Superintendent of Schools

To the School Board and Citizens of Northwood:

I herewith present for your consideration my second annual report as superintendent of your public schools.

During the school year ending July 15, 1917, the first complete year of supervision, the schools were maintained for a total in all schools of 235 weeks and the superintendent made 127 visits, averaging about one visit in two weeks at each school. At these visits some classes in all grades were examined in order to ascertain just what degree of progress they were making and in what respects, if any, they seemed to be failing to come up to the required standard of work. At these visits also any individual failures of pupils to do the proper amount of work were discussed with the teacher as was also the general outline of work to be covered and suggestions made where necessary. An effort was made to follow the outline as defined in the state program and to make the work in the different schools somewhat near uniform.

New text books in Arithmetic and Language were introduced at the beginning of the year to replace the old copies. These new books have for the most part proved satisfactory.

The work in reading under the Progressive Road to Reading system has been continued and the results with the majority of the pupils has been good.

At the close of the last Spring term five pupils were passed from the eighth grade and are now continuing their studies with good success at Coe's Academy.

At the opening of the present school year in Septem-

ber, one change in teachers was necessitated by a resignation at the Ridge Grammar School. The vacancy thus created has been very successfully filled by a graduate of the Bridgewater, Mass., Normal School and a teacher of some experience. The work in this school has gone on well and without interruption.

An attempt has been made during the present year to increase the length of the winter term. Weather conditions have somewhat hampered this endeavor yet under normal conditions it would seem that this is a step in the right direction. Pupils can do better work in school during the winter months than during the spring or summer months.

School Savings Banks have been installed in all the rooms with the exception of the Mountain. This move is in accordance with the State Program and will, without in the least detracting from the regular work of the class, instill habits of thrift in the child. Many pennies which might have been heedlessly or foolishly spent have already been saved and placed at interest to the credit of the several depositors.

Domestic Arts and Manual Training are other subjects recommended by the State Program. An opportunity for a start in adopting this branch of the curriculum might be made by utilizing the Grammar room at the Ridge; placing the present grammar pupils in the Intermediate room and making a two-room school of the Primary room by installing a partition and having both Primary and Intermediate pupils on the lower floor. This change would not only give available space for work in the above mentioned subjects but would at once result in greater economy and more satisfactory results in heating during the cold winter months as there would be much less space to be kept continually heated.

In closing, I wish to speak of the work done by your School Board in remodeling the old Mountain School. This has been converted from an old unsanitary, poorly lighted and equipped school building into one of the most modern rural school rooms to be found in this vicinity. As it now stands it is a credit to the town and a worthy model for surrounding towns to copy. It is to be hoped that at some future time all the school rooms of the town will be as well lighted and arranged.

Respectfully submitted,

W. S. ADAMS.
